

**...The Clear Choice**

*A clear non-toxic coating to prevent fouling of hull*

Hull Maxx™ is the most revolutionary superior high performance foul-release system on the market today. Hull Maxx™ provides significant fuel savings compared to conventional antifouling coatings.

Hull Maxx™ is an environmentally friendly solution to a problem which frustrated owners and captains for years.

#### **Advantages:**

- Increased vessel performance
- Increased fuel efficiency
- Easily applied
- Less maintenance costs
- Incredibly effective
- Aesthetics: clear / see-through solution

*A safe alternative to traditional polluting antifouling!*

## **Hull Maxx™ works because it's slick, not because it's toxic!**

#### **SIMPLE USE**

Hull Maxx™ application is a simple one-part procedure and does not require any special equipment.

#### **ENVIRONMENTALLY FRIENDLY**

It is an environmentally safe alternative to polluting antifouling paints and does not contain heavy harmful metals or any other toxic substances which may cause pollution.

#### **DID YOU KNOW?**

It can be applied over existing hard antifouling. It is suitable for use in both, salt and fresh water.

Code: NAS-3298. Size: 946mL Coverage: 10 - 11 m<sup>2</sup>

#### **PERFORMANCE**

Easy to clean, foul-release and hydrophobic nature features provide high performance satisfaction with significant fuel and maintenance cost savings.

#### **MULTI-SEASON**

Applied and maintained correctly, Hull Maxx™ will provide long-lasting hull protection, more speed and reduced fuel consumption!

*"I achieved an impressive 10% increase in speed (56.3 mph over prior max speed of 51 mph) and significantly less fuel burn after coating Hull Maxx over existing antifouling. I would recommend Hull Maxx to anyone."*
